05:HIGHLIGHT

05:HIGHLIGHT

Highlight does exactly what it says – it brings your business to the fore, both day and night. Whether it is shop front advertising and lighting or directional road signs, your product or company stands out for all to see.

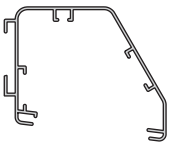

The revolutionary shadow-free lighting system is both unique and inexpensive, and yet gets the job done without being obtrusive. As evening falls, your signage becomes a safe haven for your visitors.

While the HL Illuminator is mounted onto the 100 mm Outdoor panel, both the HL 110 and 170 are secured using the supplied brackets. The standard profile length of 6000 mm can be extended to 12,000 mm or more using our connector pieces.

RANGE

- HL Illuminator
- HL110
- HL170

Highlight has been designed to be both discreet and elegant while guaranteeing your message gets seen, night or day. Its extended range is built around three basic models: HL Illuminator, HL 110 and HL 170.

Single or double-sided, extremely weather-resistant, the models come either in mill finish, anodised or a coated finish with a choice of curved or square covers and additionally offer the freedom to position the lighting to your own requirements. Their usage is multi-functional, from shop or business fronts to moving consoles and energy consumption is extremely low.

Shedding light on your business
