

# Acrylic Panel Cutting Machine

## MR-A3100SR

### Preview

Initially produced to cut acrylic panels, now this beauty can cut polycarbonate, wood, plywood, MDF and aluminum composite panel as such it is a 'multi-purpose' machine. It is possible to use this machine for various cuttings as per your wish. The machine is down-sized, weight-reduced and very effective because of its entirely new concept in contrast to previous cutting machines.

### Technical Specifications

Voltage	:	220V
Frequency	:	50 ~ 60Hz
Power Consumption	:	1,550W
Circular Saw Blade	:	External dia Ø190mm x Internal dia Ø20mm
Maximum Cutting Capability	:	upto 30mm
RPM (MAX)	:	0~3500rpm
Dimensions (L x W x H)	:	1150mm x 1000mm x 900mm
Weight	:	approximately 106kgs
