

SOLAR WINDOW FILM

NANO CERAMICS FILM

SIZE 1.52 x 30mtrs

FEATURES

- Ideal for Automotive & Building Windows
- High in IR blocking and heat reduced
- Not blocking GPS or mobile network
- Protect car indoor furnishing
- Easy apply to curve windows with heat gun
- Nano ceramics film without metal

HIGHLIGHTS

IR Nano ceramics series can be used across all automotive / commercial / residential applications. IR ceramics film is a non-metalized coating film.

It is best known for the infrared rejection.

High in transmission for visible light, and low outer light reflection.

Low in Visible Light Transmission.

No interference with electronic signals in car (GPS, 4G, etc.)

Film Type	Product Code	Characteristics	VLT	IR Reject	UV Cut	Interior Reflection	Exterior Reflection	Total Solar Energy Reflection	Solar Heat Gain Coefficient
Nano Ceramic Films	IR-8080	Nano Ceramic	80%	80%	99%	4.70%	3.80%	52%	0.50
	IR-7070	Nano Ceramic	80%	70%	99%	4.50%	3.80%	51%	0.54
	IR-3070	Nano Ceramic	32%	70%	99%	5.00%	5.00%	71%	0.43
Ceramics	FARH-3M30V	Ceramics	27%	42%	99%	5.00%	5.00%	55%	0.54
